

**Application**  
To be used with an 18mm capacitive proximity sensor on any sight glass up to  $\leq 1$  inch

**Mechanical Specifications**

Dimensions	See drawing
Material	DuPont Delrin (Acetal Homopolymer)
Maximum Service Temp (Intermittent)	300 °F
Maximum Service Temp.(Long Term)	185 °F

**Part Numbers:**  
SG18

**Features**

- Great way to solve a liquid level detection problems in sight glass level monitoring applications.
- Installation is simple and your sensor can be changed without emptying your tank.
- Durable Delrin material ensures long life-time and reliable performance in the toughest environments.
